Upon entering a game mode you will be presented with three options:

START - This will take you to the car and track selection menu before entering the race.

OPTIONS - From here the player can customize the options for the current game mode.

- **Difficulty** - Choose the level of your opponents from EASY to HARD.
- **Number of laps** - Choose how long you would like to race for. The number of laps ranges from a sprint of 3 laps to an endurance race of 15 laps.
- **SFX Volume** - Here you can alter the Effects Volume of the game. This can be set anywhere between 0% and 100% using the directional buttons.
- **Music Volume** - Here you can alter the volume of music that is played during the game. This can be set anywhere between 0% and 100% using the directional buttons.

- **Center Screen** - This screen allow you to center the display using the directional buttons.

- **Vibration** - This allows you to toggle the vibration of the DUALSHOCK® analog controller ON/OFF using the directional buttons.

Note: Changing the options in one game mode does not alter the other modes accordingly. Once a game mode has been exited the difficulty level and number of laps revert to default settings.

QUIT GAME - This selection will take you back to the Main menu of the All Star Racing.

ENTERING A RACE

After selecting START in any of the game modes, you are taken to the CAR SELECT MENU where you will be offered the choice of racing one of three cars. Using the **directional** buttons highlight the car you want to drive and confirm your selection by pressing the  button.

After choosing a car to race, you are taken to the TRACK SELECT MENU. Using the **directional** buttons choose the track you wish to race. When you have decided on a track to race press the  button to confirm your selection. The game will then load the track you have selected.

Once you start the race, you will find yourself at the back of the grid, behind the five other competitors. Your aim is to cross the finish line 1st.

Once the race is completed your position will be displayed on the results screen. If all the other competitors cross the line before you do then control will be taken away from your car and the results screen will be displayed. Pressing the **START** button can skip the results screen.

The game will then bring you back to the Main menu of the game mode you are currently playing.
